

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**List of Claims:**

1. (Currently Amended) A dispenser for a liquid crystal display panel, comprising:  
a substrate on which a plurality of image display parts is ~~formed~~ arranged in M columns  
of N lines, where N and M are greater than 2;

a table on which the substrate is loaded;

M supports above the table; and

~~a plurality of N syringes~~ affixed at each support for dispensing to dispense a material on  
the substrate; ~~and~~

~~a plurality of supports aligning and affixing the plurality of syringes, wherein at least a~~  
~~first predetermined number of the plurality of syringes is a affixed and aligned to at least one of~~  
~~the plurality of supports;~~

wherein the supports are independently driven from each other so that the syringes at  
each support dispense dispensing material in the image display parts corresponding to the  
\*support.

2. (Original) The dispenser of claim 1, wherein the substrate has at least one thin  
film transistor array substrate formed on the substrate.

3. (Original) The dispenser of claim 1, wherein the substrate has at least one color  
filter substrate formed on the substrate.

4. (Original) The dispenser of claim 1, wherein the image display parts are at least  
\*two different sizes.

5. (Original) The dispenser of claim 1, wherein the table is moved in forward/backward and left/right directions.
6. (Original) The dispenser of claim 1, wherein the material is a sealant to form a seal pattern.
7. (Original) The dispenser of claim 6, wherein the sealant is formed on the substrate and a portion of the seal pattern is open.
8. (Original) The dispenser of claim 6, wherein the sealant is formed on the substrate and the seal pattern is a closed pattern encompassing an outer edge of the image display parts.
9. (Original) The dispenser of claim 1, wherein the material is one of liquid crystal and Silver (Ag).
10. (Cancelled)
11. (Currently Amended) The dispenser of claim 1, ~~further comprising:~~  
~~a first column of image display parts on the substrate, wherein the first predetermined~~  
~~wherein the number of the plurality of syringes at the supports corresponds to the number of~~  
image display parts in ~~the first one~~ column of image display parts.
12. (Currently Amended) The dispenser of claim 1, ~~further comprising:~~

~~a first column of image display parts on the substrate, wherein the first predetermined~~  
wherein the number of the plurality of syringes at the supports corresponds to at least some of  
the image display parts in ~~the first one~~ column of image display parts.

13. (Cancelled)

14. (Cancelled)

15. (Withdrawn) A dispensing method for a liquid crystal display panel, comprising:  
aligning and affixing a first predetermined number of syringes on a first support; aligning and  
affixing a second predetermined number of syringes on a second support; loading a substrate  
having a plurality of image display parts formed thereon onto a table; and dispensing material  
onto the substrate through the first predetermined number of syringes for image display parts in a  
first column on the substrate and through the second predetermined number of syringes for  
image display parts in a first column on the substrate.

16. (Withdrawn) The method of claim 15, wherein the material is one of a sealant,  
liquid crystal and Silver (Ag).

17. (Withdrawn) A dispensing method for a liquid crystal display panel, comprising:  
aligning and affixing a first predetermined number of syringes on a first support; aligning and  
affixing a second predetermined number of syringes on a second support; loading a substrate  
having a plurality of image display parts formed thereon onto a table; and dispensing material  
onto the substrate through the first predetermined number of syringes for image display parts in a  
first column on the substrate and through the second predetermined number of syringes for  
image display parts in a second column on the substrate.

18. (Withdrawn) The method of claim 17, wherein the material is one of a sealant,  
liquid crystal and Silver (Ag).

19. (Withdrawn) A dispensing method for a liquid crystal display panel, comprising:  
affixing and aligning a plurality of syringes on first and second supports; loading a substrate with

first and second image display parts formed thereon on a table; forming first seal patterns along each outer edge of the first image display parts by using syringes of the first support; and forming second seal patterns along each outer edge of the second image display parts by using syringes of the second support.

20. (Withdrawn) The method of claim 19, wherein the first and second image display parts have different sizes.
